

RESELLERS AND AGENTS LIST

AS AT APRIL 2009

Advanced Concrete Technologies (ACT) is the manufacturer of the aerated autoclaved concrete brick branded as ecobrick.

Our primary role is as the manufacturer and wholesaler of ecobricks. We have the following state resellers and agents offering the ecobrick to the general public and building trades. ACT will deal direct with architects and designers to promote the unique benefits of the ecobrick.

In commercially competitive situations ACT will sell direct to the commercial building market to compete with other brick manufacturers operating in the same market.

BGC Plasterboard & Fibre cement branches in each state hold pallets of various sizes of bricks, including the Thin Bed Mortar and the AAC Cement. These branches warehouse stock for retail & trade hardware stores in each state and can provide technical information or order non stock bricks sizes for resale.
